Thursday, 17 October
8:30–10:00am

Red Room, FAO

*Coffee, tea and breakfast
snacks available*

RESPONSIBLE LAND INVESTMENT FOR SUSTAINABLE FOOD SYSTEMS: Taking stock of lessons from responsible land investment pilots, partnerships and platforms

This event will highlight the importance of equitable governance of land and natural resource tenure for sustainable investment in agriculture and natural resources and the key lessons from recent initiatives to develop and pilot tools and practical approaches.

After the presentations we will hold an interactive discussion and audience poll on practical priorities to ensure that private and public land investment contributes effectively to food security, improved nutrition and to the SDGs more broadly. This event aims to prepare the ground for stocktaking in future years by CFS and development partners on the implementation of VGGT principles in agricultural investment.

FEATURING

- **LEGEND:** *learning on responsible land investment and recent pilot initiatives*
- **GiZ:** *experience applying the VGGT in agricultural investment in Ethiopia*
- **FAO, Sierra Leone and Ethiopia:** *perspectives from national investment agencies on investment processes and policies*
- **ILC:** *potential of multi-stakeholder platforms to strengthen communities of practice on responsible land governance and investment*
- **CFS-PSM:** *responses from the Agri-Food Network, PSM coordinators*
